

HAMS GROUP

BRAND BOOK

Human Progress Philosophy

MOVING LIFE FORWARD.

Master brand identity for Hospitals • Automobiles • Medical Devices • IT & ITES

01 | Brand North Star

HAMS is not defined by the industries it enters. It is defined by the progress it creates.

HAMS is a diversified group united by one human outcome: making life move forward.

Brand idea
Human Progress

Master tagline
MOVING LIFE FORWARD.

Masterbrand role
Unite diverse businesses under one credible promise while allowing each vertical to remain commercially distinctive.

Health

Helping people live healthier lives through care, capability and technology.

Mobility

Helping people move with greater freedom, access and confidence.

Medical Technology

Helping clinicians and institutions make better decisions with better tools.

Digital & ITES

Helping organisations work smarter, connect faster and build new capability.

02 | Brand Positioning

A review of leading Nepalese diversified groups shows a familiar category pattern: legacy, scale, economic contribution, trust, diversification and sector capability. HAMS can own a more human-centered space.

Category signal	Observed group-brand language	HAMS opportunity
Legacy & scale	Long histories, broad portfolios, national/global presence	Build future relevance without borrowing legacy language.
Economic contribution	Growth, employment, nation-building, investment	Translate contribution into visible human outcomes.
Trust & reliability	Quality, ethics, long relationships	Make trust a behaviour, not just a claim.
Diversification	Many sectors under one corporate umbrella	Give the portfolio one human purpose.

POSITIONING STATEMENT

For people, institutions and partners who believe progress should improve real lives, HAMS Group is a diversified Nepalese enterprise that advances health, mobility and human capability through trusted businesses, technology and responsible innovation. HAMS is united by one human purpose: moving life forward.

Strategic whitespace: own the space between corporate capability and human outcome.

03 | Mission & Vision

VISION

To build a trusted, future-ready group that moves people, businesses and industries forward across health, mobility, medical technology and digital services.

MISSION

We build and operate businesses that improve everyday life by combining capable people, dependable technology, responsible innovation and disciplined execution.

Our test for growth

Growth matters when it creates durable value for customers, employees, partners and society.

Our test for innovation

Innovation matters when it makes something meaningfully better, simpler, safer or more accessible.

Our test for trust

Trust is earned through consistent actions, transparent decisions and dependable delivery.

Our test for leadership

Leadership means taking responsibility for the next chapter, not only protecting the last one.

04 | Core Values

Five values designed as operating principles, not wall decoration.

01 HUMAN FIRST

Start with the person behind the transaction. Ask what improves their life, experience, safety or opportunity.

02 EARN TRUST

Say what we mean. Do what we say. Surface problems early. Protect the long-term relationship.

03 RAISE THE STANDARD

Good is a starting point. Pursue measurable quality, disciplined execution and continuous improvement.

04 BUILD FOR TOMORROW

Invest beyond the immediate quarter. Build capabilities, platforms, talent and institutions that compound.

05 ONE HAMS

Different businesses, shared standards. Collaborate across boundaries and win as a group.

05 | Brand Personality & Archetype

THE HUMAN-CENTERED PIONEER

HAMS combines the warmth of a Caregiver with the curiosity and forward motion of an Explorer. The resulting proprietary archetype is the Human-Centered Pioneer.

Warm, not sentimental

Humanity is expressed through useful action, not emotional overstatement.

Confident, not loud

Authority comes from capability and consistency.

Progressive, not trendy

Adopt new ideas for a reason, not for novelty.

Ambitious, not arrogant

Set bigger goals while remaining grounded in service.

Premium, not distant

Sophisticated but accessible.

Nepalese, not provincial

Rooted in Nepal while designed to travel beyond it.

06 | Target Audience

Patients & families

Need confidence, dignity, access and care. Message: Better outcomes begin with people who care.

Customers & consumers

Need dependable products, service and value. Message: Progress should make everyday life better.

Corporate & institutional clients

Need capability, reliability and long-term partnership. Message: HAMS combines scale of vision with practical execution.

Government & ecosystem partners

Need responsible private-sector capability and delivery. Message: We build solutions that strengthen systems and communities.

Employees & future talent

Need meaningful work, growth and standards. Message: Build your career where progress has purpose.

Investors & strategic partners

Need disciplined growth and durable value. Message: Diverse businesses, unified direction and long-term capability.

07 | USP, Brand Promise & Emotional Triggers

UNIQUE SELLING PROPOSITION

HAMS brings together businesses as different as healthcare, mobility, medical technology and digital services under one human-centered growth philosophy: using capability and technology to move life forward.

BRAND PROMISE

Every HAMS business should leave people, organisations or systems further forward than where we found them.

EMOTIONAL TRIGGERS

Hope

A sense that tomorrow can be better.

Confidence

The feeling that capable people are behind the experience.

Progress

Visible movement from today's challenge to tomorrow's possibility.

Dignity

People feel respected, not processed.

Belonging

Employees and partners feel part of something larger than one business.

Pride

A modern Nepalese group with standards that can travel.

08 | Brand Story

Every business begins with a transaction. A hospital begins with a person seeking help. A vehicle begins with a person wanting to move. A medical device begins with a need for better information. Technology begins with a problem waiting to become simpler.

HAMS Group brings these different worlds together around one belief: progress matters most when people can experience it.

We build businesses that help people live healthier lives, move with greater freedom, make better decisions and work with greater intelligence. We believe growth should not be measured only by how much a business becomes, but by what becomes possible because it exists.

That is why HAMS is more than a group of companies. It is a commitment to forward movement: better care, greater mobility, smarter technology and stronger possibilities.

From Nepal to the opportunities beyond it, our ambition is clear.

MOVING LIFE FORWARD.

09 | Brand Messaging Framework

Level	Message	Use
Masterbrand	Moving Life Forward.	Corporate signature, campaigns, investor and institutional communications.
Purpose	Human Progress	Leadership, culture and long-term direction.
Proof	People + Technology + Execution	Evidence of capability and responsible innovation.
Healthcare	Better Health. Humanly Delivered.	Hospital and health ecosystem.
Automobiles	Greater Mobility. More Possibility.	Mobility and automotive businesses.
Medical Devices	Better Tools. Better Decisions.	Medical technology and diagnostics.
IT & ITES	Smarter Technology. Stronger Business.	Digital services, technology and ITES.

Message rule: lead with the human outcome, support it with capability, and prove it with evidence.

10 | Tagline Territory

Primary tagline: MOVING LIFE FORWARD. Alternatives are campaign or future-use territories, not competing master signatures.

01 Moving Life Forward.

02 Progress With Purpose.

03 Better Lives. Bigger Possibilities.

04 Where Progress Becomes Possible.

05 Building a Better Tomorrow.

06 Advancing What Matters.

07 Progress That People Feel.

08 Human Progress. Real Impact.

09 Better Health. Greater Mobility. Smarter Technology.

10 Moving People. Advancing Possibilities.

11 Progress Across Possibility.

12 Built Around Progress.

13 For Life. For Progress.

14 Progress, Made Human.

15 Creating What Moves Us Forward.

16 Beyond Business. Toward Better.

17 Advancing Life, Together.

18 Capability That Moves Life.

19 A Better Future, In Motion.

20 Many Businesses. One Human Purpose.

11 | Tone of Voice

Clear

Use plain, intelligent language. Avoid corporate fog.

Human

Speak to people, not audiences. Show respect and warmth.

Confident

State what we know. Avoid inflated superlatives.

Forward-looking

Use language of possibility, progress and capability.

Evidence-led

Back important claims with proof, numbers, credentials or outcomes.

Responsible

Never overpromise. Especially in healthcare and medical technology.

Write like a capable leader explaining something important to an intelligent person.

Use: progress, capability, care, trusted, forward, better, build, enable, advance, possibility.
Avoid: revolutionary, world-class, best-in-class, unmatched, game-changing, one-stop unless objectively substantiated.

12 | Visual Identity

LOGO PRINCIPLE

The H symbol combines two stable pillars with a controlled golden arc. The pillars represent foundation and trust; the arc represents movement, connection and the future.

The arc is deliberately restrained. It crosses the pillars enough to create movement, but does not extend so far that the mark becomes a separate graphic. The H symbol is designed to work independently to the left of the HAMS GROUP wordmark.

LOGO LOCKUP

[H SYMBOL] HAMS GROUP | MOVING LIFE FORWARD.

Clear space: maintain at least the width of the arc stroke around the complete logo. Never place photography, type or graphic elements inside this protected area.

13 | Colour Palette

Role	Name	HEX	Use
Primary	HAMS Navy	#082D5B	Masterbrand, wordmark, headlines, digital navigation
Accent	HAMS Gold	#D4AF37	Arc, emphasis, premium details, calls to action
Light	Cloud White	#F7F8FA	Backgrounds, clean space
Text	Deep Slate	#17212B	Body copy, long-form content
Support	Cool Grey	#6B7C8F	Secondary text, captions, dividers

Recommended ratio: 70% white/light space • 20% navy • 10% gold. Gold is an accent, not a large-area background.

14 | Typography & Iconography

PRIMARY TYPEFACE

Inter

Use Inter Display / Inter Bold for major headlines and Inter Regular / Medium for body copy. If Inter is unavailable, use Montserrat for headings and a clean sans-serif such as Arial for body copy.

TYPE HIERARCHY

H1: 30–40 pt, bold, Navy
H2: 18–24 pt, semi-bold, Navy
Body: 10–12 pt, regular, Deep Slate
Caption: 8–9 pt, medium, Cool Grey

ICONOGRAPHY

Use simple geometric outline icons with consistent stroke weight, rounded joins and restrained detail. Icons should feel engineered rather than decorative. Navy is the default; Gold highlights one key element.

15 | Photography & Design Language

People first

Show real human moments, not staged corporate handshakes.

Natural confidence

Eye-level, documentary-influenced compositions with calm expressions.

Progress in frame

Use movement, light, pathways, vehicles in motion, clinicians using technology and teams building.

Premium restraint

Clean environments, controlled depth of field, natural light, no excessive filters.

Nepal with ambition

Use Nepal's landscape, architecture and people authentically, without turning the brand into a tourism campaign.

DESIGN LANGUAGE

A premium editorial system built on generous white space, strong navy typography, a restrained gold arc motif, precise grids, thin rules and occasional full-bleed photography. The visual idea is stable foundations + forward movement.

Graphic device: the arc may become a crop, underline, divider, motion path or image mask. It should never become a repetitive decorative cliché.

16 | Website Style Direction

The website should feel like a modern corporate group, not a hospital website stretched across multiple businesses.

Hero

Large human or landscape image, short headline, one clear action.

Navigation

About HAMS • Businesses • Leadership • Impact • Careers • News • Contact

Portfolio

Four verticals presented as four expressions of the same human-progress idea.

Business pages

Outcome → capability → proof → leadership → contact.

Leadership

Concise, credible biographies with a strong governance signal.

Careers

Culture, opportunities, learning and stories from people inside HAMS.

Web style: clean minimal + refined editorial. Avoid excessive animation. Motion should communicate progress, not distract.

17 | Social Media Identity

Corporate LinkedIn

Leadership, business milestones, partnerships, talent, technology and institutional stories.

Instagram

Human stories, premium visuals, vertical storytelling, people and progress.

Facebook

Community, service updates, business stories and accessible corporate content.

YouTube

Leadership messages, corporate films, explainers, business stories and employer brand.

Short-form video

15–45 second stories showing a problem, progress and human outcome.

Recurring content series

- Moving Life Forward | stories of measurable progress.
- Inside HAMS | people, culture and leadership.
- Built for Tomorrow | technology, innovation and future capability.
- Across HAMS | how different businesses contribute to one purpose.
- People Who Move Us | employees, clinicians, engineers, partners and customers.

18 | Brand Guidelines

DO	Keep the logo clean, proportional and spacious.
DO	Use Navy as the anchor and Gold as a deliberate accent.
DO	Lead communications with a human outcome.
DO	Use evidence to support important claims.
DON'T	Stretch, rotate, recolour or redraw the logo.
DON'T	Use Gold as the dominant field colour.
DON'T	Use medical crosses, car silhouettes or technology clichés in the masterbrand.
DON'T	Call every initiative 'world-class', 'revolutionary' or 'best-in-class' without substantiation.

Brand governance

The HAMS Group corporate office should own the masterbrand, approve logo use, define annual campaign themes, maintain templates and review major external corporate communications. Each vertical can develop its own visual and verbal expression within the masterbrand system.

19 | Brand Architecture

MASTERBRAND

HAMS GROUP

The corporate reputation layer.

HAMS HOSPITALS

Better Health. Humanly Delivered.

HAMS AUTOMOBILES

Greater Mobility. More Possibility.

HAMS MEDICAL DEVICES

Better Tools. Better Decisions.

HAMS IT & ITES

Smarter Technology. Stronger Business.

Architecture rule

Use HAMS Group as the parent endorsement. Preserve strong existing consumer brands where they have independent equity, but connect them visibly to the HAMS corporate story when strategically appropriate.

20 | Brand Keywords & North Star

TRUSTED • HUMAN • PROGRESSIVE • CAPABLE • RESPONSIBLE • AMBITIOUS • PRECISE • WARM • MODERN • FUTURE-READY • CONNECTED • DISCIPLINED

THE ONE-SENTENCE TEST

If a communication does not make HAMS feel more human, more capable or more forward-looking, it probably does not belong in the masterbrand.

THE HAMS BRAND IN ONE PAGE

Purpose: Human Progress
Promise: Leave people and systems further forward.
Personality: Human-Centered Pioneer
Archetype: Caregiver × Explorer
Signature: Moving Life Forward.
Visual idea: Stable pillars + moving arc
Colours: HAMS Navy + HAMS Gold
Voice: Clear, human, confident, evidence-led
Portfolio: Health • Mobility • Medical Technology • Digital
